Title	Enhancing Science Gateways: Improving Access to HPC-ED Training Resources
Paper:	 (Jun 28, 15:12 GMT)
Track	Posters
Author keywords	Science Gateways HPC-ED Globus Training Resources
Abstract	<p>Many institutions struggle to effectively interact with their training resources. Currently, HPC-ED relies on a command-line interface (CLI) for adding and querying training materials in its database. This approach is neither user-friendly nor intuitive and many potential users lack the necessary CLI skills. Consequently, they are unable to access and benefit from the institution's training resources.</p> <p>Moreover, when seeking information, most people turn to Google, which often yields an overwhelming number of results. This makes it difficult to discern the quality and relevance of sources, leading to inefficiencies and potential misinformation.</p> <p>We aim to showcase our approach to solving this problem and what our current solution looks like.</p>
